

Welcome to the 3rd Nursing Emergency Abdominal Surgery Course. This course is based on the EASC multidisciplinary course. The parent EASC course has always embraced nursing concepts and now in recognition of the integral part of nursing care, DCRA has designed a unique course in the delivery of Emergency Surgery Care specifically for nurses.

The first EASC was held in Letterkenny, Donegal in May 2012. That award winning course has been taught in over 10 countries around the world. This is the third nEASC course and is enhanced by a faculty who are at the frontline in Emergency Surgery and Nursing.

nEASC curriculum focuses on the acute abdomen, in a multidisciplinary shared learning approach. It a forthright level discussion you have not heard before and will enhance your ability on-duty in emergency care.

Course Objectives

Understanding the natural history of key emergency surgery presentations, with emphasis on decision making.

Explore EGS nursing interaction with other disciplines.

nEASC will identify tips and traps to optimize outcome for care of the emergency patient.

This coupled with an emanual containing lectures and the latest literature bibliography will ensure your patients are getting optimal outcomes.

Who should attend?

If you treat or manage a patient with an acute abdomen in Emergency, Surgical Ward, Theatre or ICU environment this course is a must for you!

Take this opportunity to be at the cutting edge of Emergency Abdominal Surgery delivery.
